

DROP SPREADERS...

are one of the two types of devices used to spread fertilizer on lawns.

REMEMBER...

- Use on small to medium-sized lawns.
- They are more accurate than rotary spreaders.

**The Drop Spreader Pattern**

Each pass should begin right up against the strip of the previous pass—as you would lay wallpaper.

ALSO...

- Begin walking before opening spreader. Close spreader before you stop walking.
- Apply fertilizer in mid-spring, late summer, and late fall.
- Fill and empty fertilizer spreaders in easy clean-up areas.
